IMPACT

Reducing our impact.

Together with BIC, we strive to lead the way in the latest food trends. When it comes to sustainability and a healthy living environment, we aim to be an inspiring example.

Our suppliers are a crucial part of this process. They continuously work on solutions that contribute to a pleasant workplace while helping to reduce our climate impact.

Wherever we can recycle, reduce CO₂ emissions, or make processes more sustainable, we take that opportunity.

In this assortment, we indicate per category which options are the most sustainable. We do this using a rating from A to E:

A represents the most sustainable choice, with the lowest CO₂ emissions.
The higher the score, the greater the environmental impact.

With small steps, we can make the world a little better, together.
